PROFESSIONAL SUMMARY

MCA Graduate with GPA 9.00/10 (GGSIPU). Built a GDPR-compliant Data Privacy Management platform using Oracle APEX and PL/SQL, reducing compliance documentation time by 60%. Developed 5 AI/ML projects including NeoDrive (1st Place Hackathon Winner), a gesture-control system using OpenCV and MediaPipe. Proficient in LLM API integration, multi-agent systems, ETL pipelines, and relational data modeling. Oracle Generative AI Professional certified.

WORK EXPERIENCE

Junior AI Engineer · Shift S Consulting *Jan 2026 – Jun 2026*

- Built a GDPR-compliant Data Privacy Management platform (Oracle APEX + PL/SQL) covering ROPA generation, data subject request tracking, and retention schedules for 3+ data processing categories.
- Integrated company-data APIs to auto-populate ROPA records, replacing a fully manual process and cutting data entry time by ~4 hours per compliance cycle.
- Designed relational data models and PL/SQL ingestion pipelines mapping data flows and controller-processor relationships per GDPR Article 30; project ongoing with client delivery in progress.
- Prototyped an LLM + speech-processing pipeline within Oracle APEX, reducing average internal query resolution from ~8 minutes to under 2 minutes in demos.

TECHNICAL SKILLS

AI & LLM: LLM API Integration, Prompt Engineering, Multi-Agent Systems, RAG, Voice AI Development
Computer Vision: OpenCV, MediaPipe, Real-Time Pose/Hand Tracking, Gesture Recognition
Development: Oracle APEX, HTML, CSS, PL/SQL, Python (Pandas, NumPy), REST APIs, GDPR Compliance
Data Engineering: ETL Pipelines, Data Ingestion & Modelling, SQL (Joins, Aggregation, Filtering), EDA, Data Cleaning
Tools & Platforms: Power BI, Excel (Pivot, Charts), Matplotlib, Git, Postman, Oracle Cloud
Soft Skills: Analytical Thinking, Problem-Solving, Cross-functional Collaboration, Technical Communication

PROJECTS

NeoDrive - Gesture Control System | *Python · OpenCV · MediaPipe · Computer Vision*

- 1st Place Winner at VIPS College Hackathon: Built a real-time gesture-control system using dual camera feeds, MediaPipe hand/pose tracking, and OpenCV; enables gesture-based steering, pedal control, and gear shifting for driving simulations with 0 hardware latency.

Multi-Agent AI Research Assistant | *Python · Gemini API · Prompt Engineering*

- Built a 3-agent pipeline (Planner, Search, Synthesizer) that generates structured research reports from unstructured inputs, cutting manual research time from ~45 min to under 5 min per topic.

Solar AI-Assistant | *Python · Streamlit · Gemini 2.5 Flash · Prompt Engineering*

- Developed a solar-domain chatbot with Mock/Live dual-mode architecture; prompt constraints kept out-of-scope responses under 5% across 100+ test queries.

Dynamic Text-to-SQL Agent | *Python · LangChain · Llama 3 · Ollama · SQLite*

- Built a zero-shot NL-to-SQL tool converting uploaded CSVs into queryable SQLite databases; returns query results in under 3 seconds with 100% local inference via Ollama.

YouTube Data Collection & Analysis | *Python · YouTube Data API v3 · Pandas · Matplotlib*

- Built an ETL pipeline processing 200 trending videos; EDA identified 2 high-impact content patterns (runtime <5 min, publish window 2–8 PM) adopted for channel strategy.

EDUCATION

Master of Computer Applications · GPA 9.00/10 *Jul 2023 – Jul 2025*
Vivekanand Institute of Professional Studies, GGSIPU

Bachelor of Computer Applications · GPA 8.70/10 *Jul 2020 – Jul 2023*
Institute of Innovation in Technology and Management, GGSIPU

CERTIFICATIONS & ACHIEVEMENTS

1st Place – NeoDrive Hackathon (VIPS College) | HackVSIT 6.0 Winner | Oracle Generative AI Professional | Oracle Cloud AI Foundations Associate | BCGx GenAI | Tata Group Data Analytics | SQL-OneRoadmap | Data Analyst-OneRoadmap | CISCO Data Science | Postman Student Expert
